SUT PI

MID LEVEL FULL-STACK

SUMMARY

"I'm an aspiring Mid level Full-Stack Web Developer with a strong grasp of essential technologies such as React, TypeScript, and Next.js. I excel in creating user-friendly interfaces using MUI components and have hands-on experience with PostgreSQL and Prisma for efficient database management. While my exposure to Node.js and Express.js is limited, I have a solid understanding and a strong commitment to learning and growing. Eager to contribute my skills to real-world projects, collaborate with experienced teams, and continue developing as a Mid level Full-Stack Web Developer."

EDUCATION

Classic Garden Private School - High School graduate
High school graduate in 2020 at Classic Garden Private School.

Project Overview:

- Developed Foodie POS, a user-friendly point-of-sale system for the food service industry.

Key Features:
- Implemented scan-and-order functionality for quick customer transactions.
- Supported multiple business locations for enhanced scalability.

Included Apps:
- Integrated Backoffice and order apps for comprehensive business management.

Subscription Model:
- Established a subscription-based model, providing continuous access to key features.

Customer Support:
- Provided dedicated customer support to ensure a positive user experience.
-
Technological Proficiency:
- Utilized Prisma, PostgreSQL, and Next.js for efficient and robust development.
- Implemented responsive web design using Material-UI (MUI) for a seamless user interface.

Problem Solving:
- Demonstrated problem-solving skills in addressing menu management and transaction challenges.
